### Estimate Details

#### Air conditioner units

Service #	Description	Quantity	Your Price	Your Total
S-AC23	<p>2 Ton 410-A 14 SEER A/C</p> <p>New system includes removal and disposal of old AC components. A new outdoor condensing unit and evaporator coil. New copper line set from outdoor unit to A-coil above furnace. All sheet metal needed to build new transition from coil to ducting system. We will also pressure test the system with nitrogen to make sure system is leak free, after completing the leak check we will pull a vacuum on the new system to ensure there is no moisture in the system and the lines are clean for years of worry free operation. With your new cooling system you will also receive a digital thermostat to give precise control over your new cooling system. We will also install new pvc piping for moisture removal on the evaporator of your new AC system. Once we finished the install we will start up your new cooling system and check freon level to ensure your new system has proper charge for max cooling efficiency. Also included with your new cooling system is a complimentary 1 year 365Gold maintenance plan which entitles you to 2 annual visits. One visit to check the heating systems operation and well-being and one visit to check the operation and performance of your cooling system. Your new cooling system comes with a 10 year parts and 2 year labor warranty. If you would like to upgrade your warranty ask your comfort specialist about your options. Please Note: To ensure manufacturer warranty stays intact new unit (furnace and/or AC) must be maintained annually by an HVAC Professional. Filters need to be changed monthly on new unit if filter used has a Merv rating less then 13. If Merv is 13 or higher filter must be changed every 3 months.</p>	1.00	\$7,040.00	\$7,040.00
