(A) It shall be unlawful to commence or do any excavating, erecting, constructing, reconstructing, enlarging, altering, or moving of any building or structure or to use or occupy or permit the use or occupancy of any building, land or premises, or construction or connection to water or sewer facilitates or part thereof hereafter created, erected, changed, converted, or wholly or partly altered or enlarged in its use or structure until a building permit shall have been issued therefore by the Zoning Administrator stating that the proposed use of the building or land conforms to this chapter.

(B) Notwithstanding any provisions contained herein, farm buildings and structures, except farm dwellings, are exempt from the requirements of applying for and receiving building permits provided the buildings and structures must conform to all applicable provisions of this chapter.

(C) The Zoning Administrator may issue a temporary building permit for uses in any district for the purpose of uses and building incidental and required in the construction of a principal permitted use in the district in which it is located and highway construction, provided that the use be of a temporary nature and does not leave the erection of substantial buildings. The permit shall be granted in the form of a temporary and revocable permit for not more than six months subject to conditions as will safeguard the public health, safety, and general welfare.

(Ord. passed - -2000) Penalty, see § 153.999

§ 153.292 APPLICATION FOR A BUILDING PERMIT.

(A) Written applications on forms prescribed and furnished by the Zoning Administrator stating any information as may be required for the enforcement of this chapter shall be submitted and shall be accompanied by plans in duplicate, drawn to scale, showing the actual shape and dimensions of the lot to be built upon or to be changed in its use, in whole or in part, the exact location, existing and intended use of each building or structure or part thereof, the number of families or housekeeping units the building is designed to accommodate and when no buildings are involved, the location of the present use and proposed use to be made of the lot, existing and proposed water and sanitary sewer facilities, as may be necessary to determine and provide for the enforcement of this chapter. One copy of the plans shall be returned to the owner when the plans shall have been approved by the Zoning Administrator together with the building permits as may be granted. All dimensions shown on these plans relating to the location and size of the lot to be built upon shall be based on actual survey. The lot and the location of the building thereon shall be staked out on the ground before construction is started.

When the permit is obtained, the city will supply to the property owner the minimum specifications the flat work must meet to pass an inspection. Any work completed without a permit, if the work does not meet the minimum specifications established, it may be required to be redone.
